ECONOMIC REVIEW

After a fiscal pricing in 1991, India has increasingly adopted free market principles and liberalized its economy to international trade. The reforms largely favored industrial growth in country. Hence, the country's economic growth progressed at a rapid pace with relatively large increases in per capita incomes.

The global gross domestic product (GDP) in the year 2015 grew is tepid and is likely to be moderate in terms of the international events. However, India is better placed. This momentum is expected to be maintained in the coming year with the new government and pro-growth policies.

This is likely to improve with the new pro-growth government. Inflation continued to haunt in financial year 2014-15 with consumer price index (CPI) inflation showing an upward trend.

INDIAN MARKET

The sentiment of Indian Industry was positive due to change in Government. The economy was showing the sign of returning to growth path and fiscal & current account deficit were lower, thanks to falling oil prices. The inflation was also in control.
